## JUNIOR SOFTWARE ENGINEER

## EXPERIENCE

Junior Software Engineer

- **Duration:** 02/February - Present
- **Company Name :** Codespace

1. Studied software engineering and gained expertise in ReactJS and Next.js.
2. Developed user-friendly websites, both static and dynamic, ensuring seamless user experiences.
3. Acquired strong debugging skills and honed project planning abilities.

## Interests

- Web development
- Mobile app development
- Machine learning

## Project

**Dynamic Web Application: "PodcastHub"**

**Duration**: January 2023 - March 2023

**Description**: During a short, intensive period of learning, I spearheaded the development of "PodcastHub," a dynamic web application utilizing Vite and React. This project required a rapid acquisition of new skills and knowledge. I successfully engineered a user-friendly podcast website integrated with an API. Authentication was enforced for all users through the implementation of Supabase as the backend solution.

**Technologies Used**: ReactJS, Redux, JavaScript, HTML5, CSS3, RESTful APIs, Git, Figma

## References

Available upon request.

## PROFILE

Highly motivated and enthusiastic software developer with a strong background in technical communication. Currently studying software development at CodeSpace, with a passion for web development and creating user-friendly applications. Skilled in using Figma and Notion for project planning.

## EDUCATION

**Mechanical Engineering**
Fitting And Turning
*Graduated: May 2020*

## CERTIFICATIONS

**N2 Certificate in Mechanical Engineering(Fitting And Turning)**
Orbit Tvet College
2020
